YONGE, JULIAN BARGUS, ESQ.,
OTTERBOURNE, WINCHESTER.

REPORT

OF

The Committee of Visitors

OF THE

County Lunatic Asylum,

AT THE

EPIPHANY SESSIONS, 1870.

Southampton, to wit,—AT the General Quarter Sessions of the Peace of Our Sovereign Lady the Queen, holden at the CASTLE OF WINCHESTER in and for the said COUNTY OF SOUTHAMPTON, on Monday, in the first Week after the twenty-eighth day of December, 1869, to wit, the third day of January, in the thirty-third year of the Reign of our Sovereign Lady Victoria, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, and in the year of our Lord One Thousand Eight Hundred and Seventy, before THE RIGHT HONORABLE CHARLES VISCOUNT EVERSLEY, Chairman, THE RIGHT HONORABLE HENRY HOWARD MOLYNEUX, EARL OF CARNARVON, MELVILLE PORTLAND ESQUIRE, and others their Fellows, Justices of our said Lady the Queen, assigned to keep the Peace of our said Lady the Queen in the County aforesaid: and also to hear and determine divers Felonies, Trespasses, and other Misdeeds, committed in the same County:—

ORDERED, That the Report of the Committee of Visitors of the County Lunatic Asylum, presented at this Court, be printed, as soon as the Receipt and Expenditure Accounts are received, and that copies be transmitted to the several acting Justices, and to the Boards of Guardians of the several Unions within the County.

By the Court,

T. H. EARLE,

Clerk of the Peace.

REPORT.

THE Visiting Justices are happy to be able to present a favourable Report as to the condition and management of the Hants County Asylum during the past year. The mortality amongst the Patients has been extremely low; the Recoveries bearing about the usual proportion to the Admissions. The conduct of the Attendants has been good, and there have been few changes in the staff, which continues efficient as heretofore.

At the last meeting of the Committee, on the 28th of December, there were in the Asylum 290 Males, 336 females,—total 626, being an increase of 7 as compared with the numbers at the corresponding period of last year. It will be satisfactory to the Court to be informed that of this large total nearly 300 are regularly and usefully employed in and about the work of the Asylum, as appears more in detail by the following statement:—

WOMEN				MEN			
Housework and Kitchen ...		8		Farm and garden ...		36	
Laudry		52		Workshops		34	
Nedleroom		50		Wards		37	
Gardhelpers		38				<hr/>	
Needlework		40				107	
		<hr/>		Women		188	
		188		Total		<hr/> 295	

d there are many others occasionally occupied according
their capacity.

Continued
Pressure for
Accommodation
for Patients

To meet the continually increasing pressure for accommodation, the number of Borough Patients has been further slightly reduced. Considerable relief has also been obtained by the removal of 48 quiet and harmless Patients to their respective Workhouses. A circular was addressed to the Guardians of the different Unions, recommending this course to be taken in case of those Patients who, in the opinion of Dr. Manley, might be easily and properly managed in the Workhouses. They were discharged, in the first instance, for one month only, upon trial; but the experiment proved successful, and it is satisfactory to your Committee to have thus provided space for the reception of many urgent cases, without parting with a large number of those chargeable to the Boroughs.

In spite, however, of these arrangements, the Asylum is again full, and it is obvious that the Workhouses can, and indeed, ought to be, available only to a limited extent in the way of relief.

The whole subject of this tendency to over-crowding is of great importance, and will continue to receive the anxious attention of your Committee.

Receipts and
Expenditure

So far as can be ascertained, the income and expenditure for the year have been as follows:—

Receipts on Maintenance Account	£14492	5	7
Payments on Ditto	14137	6	5
Balance	£354	19	2
Receipts on Building Account	879	17	10
Payments on Ditto	756	17	7
Balance	£123	0	3

The Commissioners in Lunacy have recently visited the asylum, and have recorded their high sense of the zeal and ability displayed in its supervision by Dr. Manley and his assistant, Mr. Pater. In these observations your Committee cordially concur, and, in conclusion, beg to call the attention of the Court to the many interesting particulars and statistics supplied by the Medical Superintendent, the Chaplain, and the Clerk to the Visitors, and which will be found appended to this Report.

G. SCLATER-BOOTH,

Chairman.

WICKHAM,

December 28th, 1869.

MR. CHAIRMAN, MY LORD AND GENTLEMEN,

THE revision of any one ministerial year for the purpose of my Annual Report, is at once an interesting but serious duty; for, while it recalls many circumstances more or less encouraging, it reminds me of responsibilities more or less inadequately supported.

Before offering any special remarks it will be well to make a brief statement of a statistical nature.

The maximum number of Patients attending Chapel on Sunday is 250, with but slight disparity between the Male and Females.

At the intermediate Service on the Male side of the House there are generally fifty Patients present.

The congregation at the Wednesday Evening Service is something less than that on Sunday.

The average attendance at the Evening School is about thirty, though there are upwards of fifty names on the book.

There are forty-eight separate monthly publications and seventeen weekly; of the former, 174 copies are put in circulation, and sixty-nine of the latter. The average

number of books circulating from the Library is fifty. At each of the four celebrations of the Holy Communion the communicants are about thirty.

The Interments in the Cemetery since my last Report have been forty-two.

As a preliminary observation I may say every duty prescribed for the Chaplain has uninterruptedly been performed by myself during the past year, and my Register contains all the requisite information on this head.

My experiences in every way have accorded with those former years. It is gratifying still to observe the evident appreciation of the more public services of the chapel, manifested by the share taken in the responses and the singing, and by the quiet and attentive attitude maintained. Permission to attend is regarded as a privilege, and is extended to all capable of self-control, which ensures the non-disturbance of the general congregation. Through one agency or another the Sunday services never lack the elevating accompaniment of music, whether psalmody or chanting.

The intermediate Service referred to above is held especially for the benefit of the Epileptics and those otherwise debarred by their infirmities from the Chapel. The Wednesday Evening Service is always fairly attended, more particularly as the year declines and out-door occupations are discontinued.

The School continues to flourish under the same judicious management. Many derive solid advantage from it, while, many others, the School hour affords, at least, a pleasing

and beneficial relief, though the results, when viewed simply scholastically, may be but small. My own weekly superintendence is always attended with gratification.

As to the religious and secular publications now so numerous and freely circulated, their beneficial effects are patent. On both sides of the House I notice them in many hands, diverting many a mind from dwelling on its own sad thoughts, and amusing the eye and producing quietude, even where there may not be the mental capacity for understanding the subject matter of the book.

The details of my pastoral visitations could not fail to interest every one concerned about the welfare of the Institution, but they are unsuited for the pages of the Report. It must suffice me to record the great importance I attach to these visits and the real satisfaction they give me.

There are never wanting cases to which I can minister with peculiar pleasure, cases which cause one thankfully to recognize the thorough adaptation of religious truth, with all its soothing influences, to those laboring under the saddest form of human suffering, and to mark the power inherent still in human kindness and human sympathy.

Not unfrequently do I hear of those who, after their discharge, gratefully remember all that was devised for their temporal and spiritual advantage, while they were Inmates of the Asylum.

As to the general body of Attendants, I refer with much gratification to the satisfactory tone that prevails; it argues

well for the best interests of the Patients, and the external stimulation of the Institution.

On viewing in their entirety the religious duties devolving upon me, I thank God for making them as effectual for their ordained end; and, in conclusion, would becomingly acknowledge the actual and moral support afforded one by the Medical Officers, in discharge of responsibilities which involve the spiritual interests of all with whom I have to do.

I remain,

MR. CHAIRMAN, MY LORD AND GENTLEMEN,

Your very faithful and obedient Servant,

G. H. MASON,

Chaplain.

George Sclater-Booth, Esq., M.P.,
Chairman of Committee,
Hants County Lunatic Asylum.

HANTS COUNTY ASYLUM,

28th December, 1869.

MR. CHAIRMAN, MY LORDS AND GENTLEMEN,

THERE were in the Asylum on the 25th of last December 287 Males and 232 Females, or a total of 619 Patients. During the past 12 months 84 Males and 89 Females have been admitted, hence it follows that there have been under treatment 271 Males and 421 Females, or a total of 792 Persons.

The average daily numbers resident have been 293 Males and 331 Females, or a general average of 624 inmates.

16 Males and 30 Females have been discharged recovered, or an average of 27 per cent. on the admissions and 29 Males and 27 Females have died, or 9 per cent. of the daily average numbers resident.

2 Males and 2 Females have been taken away by their friends.

1 Male and 1 Female have been transferred to other Asylums, and 27 Males and 22 Females have been removed to Workhouses.

There remain on the books this day 296 Males and 342 Females, total 638; but there are actually in the house only 635 Patients, one Male, a Criminal still under sentence having made his escape last June.

Not a half of the Patients admitted during the year presented any reasonable prospect of recovery, and the bodily condition of many was so feeble from advanced age

at any considerable prolongation of life could not be anticipated, yet the Patients sent here have been, almost without exception, fit objects for an Asylum, and it would have been difficult to have managed them in their own homes, but a long journey and the change from confirmed habits and associations cannot but have exerted an unfavorable influence, and, in some cases, it probably hastened the fatal termination of the malady.

The number of Epileptics and Idiots in the Asylum, as marked by the Commissioners in Lunacy at their recent inspection, is unusually large, and from the attention they require and the trouble they give, they greatly increase the care and anxiety of the Attendants. Still no serious injury of any kind has occurred during the year, and I am pleased to add that those in charge of the Patients have performed their duties in a satisfactory manner, and that very few changes have taken place in the Staff of the Asylum.

The Inmates have been very free from bodily illness, acute disease has been rare, and the deaths that have taken place have resulted from ordinary and anticipated causes. The only case of illness to which I have specially refer was one of Stangulated Hernia, in which an operation was necessary, and terminated successfully. Considering the large number who are ruptured, and on whom no apparatus can be used in consequence of the mental condition of the Patients, it is indeed wonderful that surgical interference is so rarely required.

The ventilation of the Asylum is excellent, otherwise with the crowded state of our Wards we should probably have had more illness amongst the Inmates. Having thus

referred to the crowded state of the house, I may add that I have given the subject a good deal of anxious attention and have endeavoured to ascertain whether there has or has not been an increase in the amount of insanity in the County, and if so, the causes to which such increase is probably due. For this purpose I have consulted the returns sent to us annually by the Clerks of the Board of Guardians, as well as our own Books, for a series of years, and I take advantage of the present occasion to show the result of my investigations and the grounds on which I have formed my opinions.

In the year 1862 there was a change in the law by which all Paupers in Asylums were made chargeable to the common fund of the Union to which they belonged, and in my Report for that year I ventured to anticipate as a result that a great many Imbeciles, Idiots, and Chronic Lunatics who, under the old system, would probably have ended their days in the Workhouse, would henceforward be sent to the Asylum, shewing that such had been the tendency during the first nine months the change had been in operation. To my surprise, however, I find that very few such persons have been sent here.

On the 31st December, 1863, there were 130 Males and 178 Females, or a total of 308 Persons regarded as Lunatics receiving Parochial Relief either at their own homes or in the Workhouses in this County, excluding in this as in most other calculations those chargeable to the Boroughs of Portsmouth and Southampton. On 31st December, 1862, the numbers similarly situated were 128 Males and 190 Females, total, 326, or an increase of only 16 in the years. Of these 326, 176 were reported in 1863. During

the interval 200 new names had been added to the Lists, making a total of 508 recognized Pauper Lunatics out of the Asylum, of whom only 48 have been sent into it. Of these 48, 30 were Epileptics or Idiots, 3 were transferred from other Asylums, and 6 others were persons with either suicidal or dangerous propensities or whose disease was of recent origin. Whether the others need have been sent there may be doubtful. Still, including all, it appears that during the past 6 years only $1\frac{1}{2}$ per cent. per annum of the Lunatic Paupers in question have been admitted into the Asylum, or to put the facts in a converse position 782 persons have been sent here during the last 6 years who were unrecognized as Insane Paupers up to the time of their removal.

During the years 1858, 1859, 1860, and 1861, the numbers of Patients in the House on the 31st of each December, chargeable to the County and the Unions in the County, varied but little; they were respectively 360, 356, 353, and 375.

Since 1861 the numbers have increased largely, until this year they reached 505.

During the same years the number of Patients chargeable to non-contributing Boroughs have diminished from 187 in December, 1861, to 117 in December, 1868. In other words, the Borough Patients, who in 1861 and 1862 were about 33 per cent. of the Inmates, had at the end of last year decreased to about 17 per cent.

The reason the Borough Patients have decreased is very clear,—they have been from time to time draughted off to make room for those belonging to the County and the

Unions in the County for which the Asylum was originally built. But why there should have been so large an increase in the numbers sent from the Unions is not so easily accounted for. I have shown that it does not depend to any material degree on the concentration here of previously recognized Pauper Lunatics, yet our Admission Register shows that a very large proportion of the Patients were when brought here suffering from disease of long standing, and as I remarked before that the incurable cases are in excess of the curable. How does this happen? Why the number should have been tolerably stationary for a period of 4 years from 1857, I cannot say, for I can find no clue of any kind to guide me in forming an opinion, but as to the increase on looking over the causes of insanity as I learn them from the admission papers and the histories of the Patients as far as I can get at them, I find there are certain statements very limited in number, which are constantly recurring as to the probable reason of the disease. These are set down as congenital defect constantly combined with Epilepsy, or Epilepsy producing Dementia and leaving the Patient in the same condition as that of a Congenital Epileptic Idiot. Such persons, should they live long enough, become a burden which their friends cannot support, or are no longer manageable in a small crowded cottage, or perhaps they lose their protector. In either case they find their way sooner or later, into the Asylum.

Again there is that condition of mind, the result of old age, termed fatuity or second childhood, in which old people become mischievous and uncontrollable; that too sends them to the Asylum, and my experience is that there are a good many prematurely old amongst those who come under my care.

Then we have long lists of those, in whom domestic anxieties, bodily illness and debility, often resulting from hard living and indifferent or insufficient nourishment, have brought on some form or other of insanity. Strong excitement of the emotions or instincts, indulgence in habits of intemperance, and lastly, the gloomy views of futurity which are so frequently promulgated amongst the uneducated and weakminded, all tend to phrensies and end in unhinging the mind of the sufferer and rendering him a proper subject for an Asylum.

From these premises I infer then that there has been an actual increase in this County in the number of recognized Pauper Lunatics, for whereas there were only 707 acknowledged in December, 1863, there were 843 accounted for in December, 1868; that the presence of insanity in a poor man's family makes a pauper of the afflicted member; and lastly, that the causes which are chiefly concerned in producing insanity are constant, and that an increase in the number of Insane Paupers is still to be expected.

In concluding my Report, I would mention that my endeavours to promote the good of the Patients and the well-being of the Establishment have met with a ready and constant co-operation from the Officers of the Asylum.

Thanking you for the continued kindness I receive from yourselves,

I am,

MR. CHAIRMAN, MY LORDS AND GENTLEMEN,

Your obedient faithful Servant,

JOHN MANLEY, M.D.,

Superintendent.

to the Committee of Visitors
of the Hants County Asylum.
